TYPE Cone Tip Wand Assembly
 STYLE Flexible

ASSEMBLY INSTRUCTIONS

This assembly is shipped complete in one carton. When unit is unpacked, check to see that wand is completely assembled.

OPERATING INSTRUCTIONS

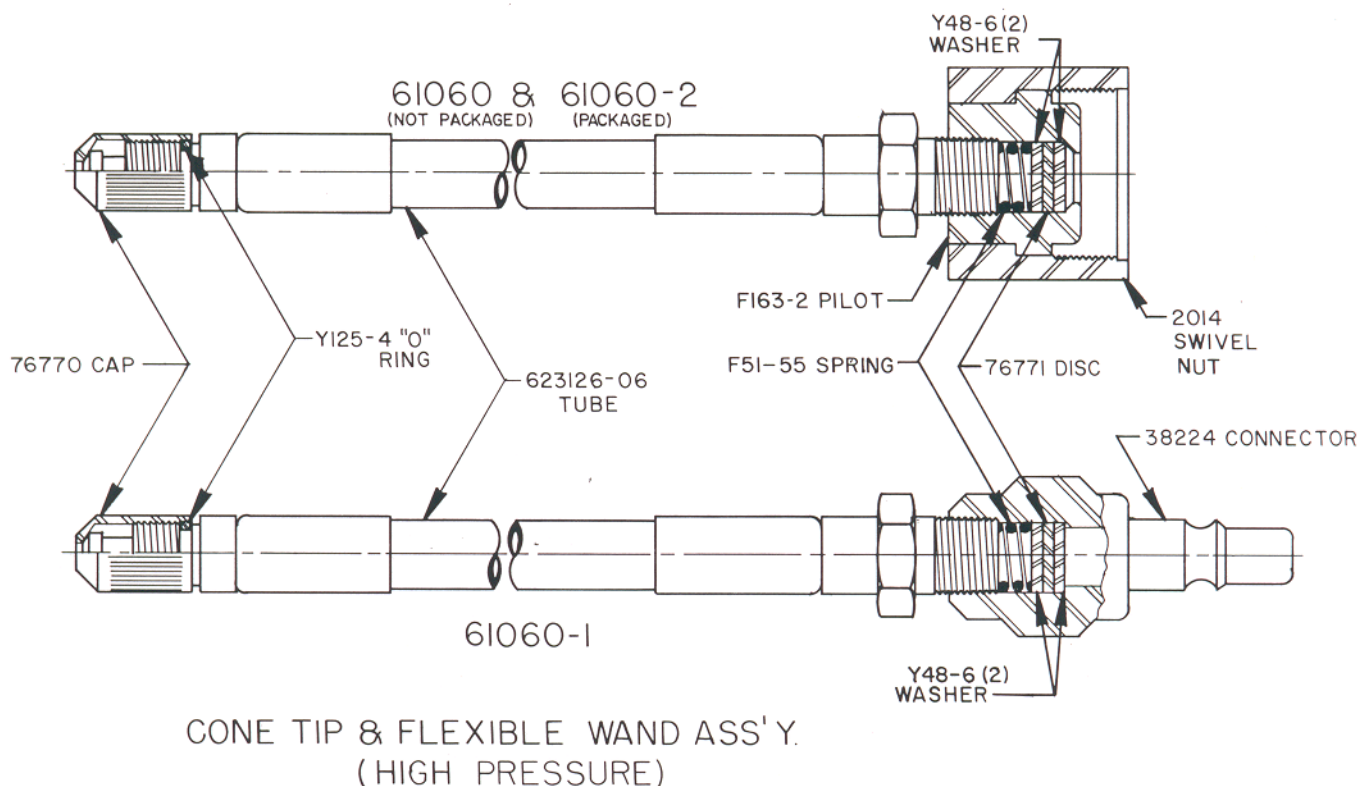

The 61060, -1 or -2 spray wand assembly is used in curved or irregular enclosed body structures such as rocker panels.

When using spray wand assembly, place the flexible wand into the section to be sprayed. Press lever on the gun and spray while retracting the wand from the section.

NOTE: Use extreme caution when working on doors which contain power window mechanisms, so as not to damage mechanism or wiring. If in doubt remove inner door panel and spray directly.

CLEANING HINTS

To prevent material from hardening in the spray wand, clean thoroughly after using. Clean with solvent. Clean cone tip with a stiff brush, (such as an old tooth brush). Remove 76770 cap. Flush material from inside of the tube.
