

# OPERATOR'S MANUAL

# NP322R-X

## SPECIFICATIONS, SERVICE KITS, GENERAL INFORMATION

INCLUDE MANUALS: 651615-D LIFT / RAM (PN 97999-1025), 65184X-X FOLLOWER PLATE (PN 97999-605), NM2322X-X PUMP (PN 97999-755) & S-636 GENERAL INFORMATION MANUAL (PN 97999-636).

RELEASED: 2-20-98

REVISED: 9-10-03

(REV. C)

## NP322R01-1 and NP322R02-1

CARBON STEEL

STAINLESS STEEL

## RAM & PUMP ASSEMBLY

### SERVICE KITS

- Use only genuine ARO® replacement parts to assure compatible pressure rating and longest service life.
- **104158** for repair of 127122-000 regulator.
- **104176** for repair of F25241-100 filter.
- **104177** for repair of R27241-100 regulator.
- **116772** for repair of E512LM valve.
- **637290-P43** for repair of 67100-P43 lower pump section.
- **637291-P43** for repair of 67101-P43 lower pump section.
- **637316** for repair of 66915 air motor section.

### SPECIFICATIONS

Model Series	NP322R0( )-1
Type	Air Operated, Chop Check
Ratio	22:1
Air Motor	66915
Motor Diameter	3" (7.62 cm)
Stroke (Double Acting)	3" (7.62 cm)
Air Inlet (female)	1/2 - 14 N.P.T.
Lower Pump End Series	
NP322R01-1	67100-P43
NP322R02-1	67101-P43
Material Outlet (female)	1/2 - 14 N.P.T.F. - 1

### PERFORMANCE

Air Inlet Pressure Range	0 - 150 p.s.i. (0 - 10.3 bar)
Fluid Pressure Range	0 - 3300 p.s.i. (0 - 227.6 bar)
Maximum Rec'd Cycles / Minute	120
Displacement In <sup>3</sup> Per Cycle	1.9
Volume / Cycle	1.05 oz. (31.1 ml)
Cycles Per Gallon	121.6
Flow @ 60 Cycles / Minute	0.5 g.p.m. (1.9 l.p.m.)
Noise Level @ 100 p.s.i.	85 db(A) *

\* The pump sound pressure level has been updated to an Equivalent Continuous Sound Level (L<sub>Aeq</sub>) to meet the intent of ANSI S1. 13-1971, CAGI-PNEUROP S5.1 using four microphone locations.

### IMPORTANT

This is one of the ten documents which support the system. Replacement copies of these forms are available upon request.

Figure 1

#### MAJOR COMPONENTS

Item	Description (size in inches)	Qty	Part No.
A	Single Post Ram	(1)	651615-D
B	Basic Pump (NP322R01-1)	(1)	NM2322E-11-P43
	(NP322R02-1)	(1)	NM2322F-11-P43
C	Follower Plate (NP322R01-1)	(1)	651840-1
	(NP322R02-1)	(1)	651840-2
	Portability Kit (optional)(not shown)	(1)	66713

### OPERATING AND SAFETY PRECAUTIONS

**⚠ WARNING** READ THE GENERAL INFORMATION MANUAL INCLUDED FOR OPERATING AND SAFETY PRECAUTIONS AND OTHER IMPORTANT INFORMATION.

**⚠ WARNING** DO NOT EXCEED MAXIMUM OPERATING PRESSURE OF 3300 P.S.I. (227.6 BAR) AT 150 P.S.I. (10.3 BAR) AIR INLET PRESSURE.

## GENERAL DESCRIPTION

ARO systems are totally enclosed, sealing the material in the system from air and moisture, preventing premature cure-out of the material. This allows for either continuous or intermittent use of the system and reduces the need for daily system clean-up. The built-in lift capability allows for quick drum changeover and easy lifting of pump assembly from the container.

## INSTALLATION

The NP322R0(-) 1 Chop-Check Dispensing System comes completely assembled. Remove unit from crate and place on a level surface. Install material hose and dispensing device as required.

When the following instructions are observed, heavy paste materials can be pumped directly from their original 5 gallon drum without air inclusion, or excessive waste. The follower plate creates an air tight seal as well as clean-wiping action in its progressive downward movement into the drum.

## OPERATING INSTRUCTIONS

### REFER TO PAGE 3:

1. Once the lift / ram assembly and pump are in the "up" position, place and center an opened 5 gallon drum of material on the lift / ram base. Use the stops on the base to center the 5 gallon drum. Tighten thumb screw to secure drum.
2. Lubricate lower follower wiper plate seal with grease. NOTE: Make certain the grease is compatible with the material being dispensed. This ensures a smooth fit into the pail as well as prevents curing type compounds from bonding to seal.
3. Check vent plug on follower plate to be sure it easily threads in and out. It is recommended to lubricate the threads of the plug to help prevent possible set up of compound at this point. **See 65184X-X Follower Plate Operator's Manual.**

### TO LOWER LIFT:

**⚠ WARNING** PINCH HAZARD. Follower can descend quickly causing injury. Keep hands clear when aligning with container.

**NOTE:** Be certain the follower plate vent plug has been removed so that the air trapped between the follower and the material is allowed to escape from this vent. Captured air between the follower plate and drum will escape.

**NOTE:** The lift / ram may hesitate momentarily before starting downward. The air pressure inside the post air chamber must decrease before it will begin to descend.

1. Shift the control valve lever to the "down" position and proceed to lower the pump.
2. Replace the vent plug once the material begins to ooze from the vent opening.
3. The unit is now ready for operation. Adjust the air pressure on the pump filter / regulator (turn pump regulator knob clockwise) until the pump begins to cycle.
4. Trigger gun to prime pump with material.

### TO RAISE LIFT, (NORMAL OPERATION):

1. Adjust the follower plate air valve pressure up to approximately 8 p.s.i.g. (0.55 bar). **DO NO OVERPRESSURIZE THE DRUM** to avoid damage. NOTE: Air from this valve will only pass when the control valve is in the "up" position.
2. Shift the control valve lever to the "up" position.
3. Raise the lift / ram high enough to clear the height of the drum. Stop the lift / ram's upward travel by moving the control valve lever to the "neutral" (center) position.

### TO CHANGE DRUM:

**NOTE:** The control valve lever should be in the "neutral" position.

1. Unscrew thumb screw and remove old 5 gallon drum.
2. Place and center a new drum into position. Remove cover. Tighten thumb screw.

### TO RAISE LIFT:

1. Take note of the pump / drum clearance above. Be certain the lift / ram is clear of any objects above. Also refer to "Operating and Safety Precautions" found in "Lifts and Rams General Information Manual" (pn 97999-635).
2. Connect the air supply (150 p.s.i. / 10.3 bar max.) to the air inlet. Adjust air pressure on lift / ram pressure regulator (turn knob clockwise) to 20 p.s.i. (1.4 bar).
3. Shift the control valve lever to the "up" position.
4. Raise the lift / ram high enough to clear the height of the drum. Stop the lift / ram's upward travel by moving the control valve lever to the "neutral" (center) position.

● Included in 651615-D Single Post Ram.
