• To keep downtime to a minimum, it is desirable to have on hand certain repair parts. We recommend that you stock one (pair or set) of each part indicated by a bullet (•) for every four tools in service.

+ Standard equipment with all models ending in **M**, **MC** or **ML** and **ALL** Front Exhaust models; optional equipment on all other models.

 **WARNING**

Always install a Locking Throttle Lever Assembly (6A) on a tool with a Low Profile Concentric Flange (19A). Do not equip a tool with a standard non-locking Lever (6) and Low Profile Concentric Flange. This can allow the tool to continue to run if dropped or set down.
