

Service Kits include three DB9 (9-Pin Serial) components. Combinations of these can be used to communicate with Assembly Solutions products:

- (1) Male-to-Female Null Cable
- (1) Female-to-Female Gender Changer
- (1) Male-to-Female Null

## **INSIGHT PFS6, INTELLECT, PFS-G, and Insight IC**

### **Transferring Data with Serial Port**

(Located on the side of the Insight IC and PFS-G or on the backplane of the PFS6 and Intellect)

## **AUTOSTREAM PC**

### **Loading Software with the Serial Port**

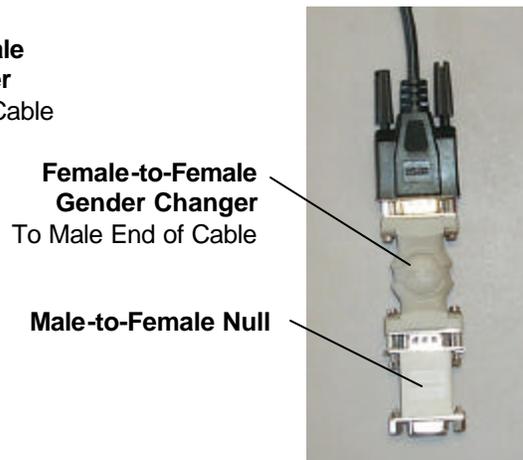

(Located on the Side of the PC)

## **INTELIFT**

### **Changing Parameters with Serial Port**

(Located inside the Main Enclosure)

**Note:** When two nulls are added together, they cancel each other out, producing a "straight" cable.
